

Taiyo Williamson

tpwilliamson@dons.usfca.edu | (808) 368-9871 | San Francisco, CA | taiyyoson.com

EDUCATION

University of San Francisco, San Francisco, CA

B.S. in Computer Science, GPA: 3.69

Aug 2022 - May 2026

Graduated May 2026

Relevant Coursework:

- Computer Architecture, Computer Networks, Systems Foundations, C & Systems Programming, Data Structures & Algorithms, Full-Stack Web Development, AI Foundations, ML Foundations, AI for Redistricting, Algorithms

EXPERIENCE

PoseTek, San Francisco Bay Area, CA | *Founding Software Engineer*

Mar 2026 - Present

- Developed a sports-tech platform to track biomechanics metrics geared towards youth soccer academies.
- Raised ~\$80k pre-seed and contracted with clubs in the Bay Area to democratize affordable bio-tracking technology.
- Extended Python Cloud Run services on GCP that process video and generate AI training plans and coaching chat.

Fastly, San Francisco, CA | *Software Engineering Intern*

May 2025 - Aug 2025

- Designed and built a Go-based API cache-testing tool from the ground up—shipped company-wide—integrating directly with cache nodes across deployment types to test compute and observability stack components.
- Built a parameterized HTTP request layer in Go to enable flexible testing across Fastly's API surface.
- Deployed the tool via Fastly's CI/CD pipeline as an internal API on a private Kubernetes cluster with a custom Helm chart, streamlining provisioning on new machines.
- Collaborated with the Embedded Fastly team to optimize, scale, and test Fastly's global CDN servers, supporting infrastructure built to handle high-volume production traffic.

CS Department, University of San Francisco, CA | *VGL Research Assistant*

Feb 2026 - July 2026

- Maintained the USF lab server infrastructure and led development of Nala, an AI health coaching chatbot.
- Coauthored a publication entry on Nala at ACM SIGCHI, and presented at the Dean's Reception for Donors event.

CS Department, University of San Francisco, CA | *CS Tutor & TA*

Jan 2025 - May 2026

- Supported and provided tutoring in debugging, project management and development, and exam prep.
- Hosted workshops on SSH & Git basics, developed lesson plans and coding exercises to reinforce core concepts.

Hack4Impact, University of San Francisco, CA | *Chapter Founding Executive Director*

Jan 2024 - May 2026

- Founded USF's 3rd computer science club, structuring it as a student software consultancy to give members exposure.
- Taught students a React-Next.js-AWS-oriented tech stack to build and ship software solutions for local nonprofits.

Pacxa, Honolulu, HI | *Software Developer Intern*

June 2024 - Aug 2024

- Leveraged Microsoft Power Apps to develop a business-purpose talent and certification management tool.
- Developed Power Automate flows to automate email, Excel, and Office 365 tasks, decreasing manual labor by 80%.
- Implemented RBAC for Pacxa's 50+ employees, eliminating unauthorized access.

PROJECTS

Nala: [Github](#)

Aug 2025

- Built a full-stack AI health coaching app using Claude Sonnet 4.5 with a RAG pipeline backed by 58 real health coach transcripts, enabling contextually grounded, session-aware conversations across a 4-session coaching program.

Network Compression Detector: [Server-Client](#) | [Standalone](#)

May 2024

- Built paired client/server tools in C with raw socket programming to detect compression links on network paths, distinguishing them by timing high vs. low entropy UDP packet trains. Detects with 100% accuracy.
- Validated end-to-end over TCP/UDP between Ubuntu VMs with Wireshark packet captures; reimplemented in Go and benchmarked both implementations.

TECHNICAL SKILLS

- Programming Languages: Golang, C++, Rust, C, Python, Java, RISC-V, React JavaScript, R, HTML, CSS, CUDA
- Software/Framework: Kubernetes, Helm, Jenkins, Terraform, Docker, Node.js, Git, GCP, AWS, Ubuntu Linux
- Languages: Proficient in Japanese
